

## **BRIDGE COURSE**

Upon admission, students are enrolled in an online Bridge Course. The Bridge Course is a no-charge, no-credit course intended to provide students with a refresher and skills summary of topics and concepts that will be important in the ELET classes and labs. Important Circuit Analysis and Digital Fundamentals topics will be provided for review with examples. Although all requirements must be completed before a specified deadline, this course is completely self-paced and successful completion is based on passing two tests with a defined minimum grade.
